

Year 1 Science How does my body know what's around me?

Sticky Knowledge

Humans are animals, with hair on their bodies.
 Humans belong to the group called mammals.
 Body parts on the inside can include the heart, the lungs, the stomach and the brain.
 Different body parts do different jobs.
 Our senses help us see, hear, taste, smell and touch.

Vocabulary

Sight | Your eyes let you see things around you. 👁️👁️
Taste | Your tongue allows you to taste flavours such as sweet or sour. 🍷
Smell | You smell with your nose. 📌
Touch | Your skin lets you feel things. 🖐️
Hearing | Ears listen to sounds around you. 🦻

Scientific skills I will develop

To identify and classify

To perform simple tests

Senses

sight

hearing

touch

taste

smell

Parts of the Body

head

eye

nose

teeth

elbow

thumb

knee

toes

leg

hand

finger

leg

foot
