## Mobile Technologies Policy

**Love    Learn    Pray**

Mobile technology devices may be a school owned/provided or privately owned smartphone, tablet, notebook/laptop or other technology that usually has the capability of utilising the school's wireless network. The device then has access to the wider internet which may include the school's learning platform and other cloud based services such as email and data storage.

The absolute key to considering the use of mobile technologies is that the learners, staff and wider school community understand that the primary purpose of having their personal device at school is educational and that this is irrespective of whether the device is school owned/provided or personally owned. The mobile technologies policy should sit alongside a range of policies including but not limited to the safeguarding policy, anti-bullying policy, acceptable use policy, policies around theft or malicious damage and the behaviour policy. Teaching about the safe and appropriate use of mobile technologies should be included in the online safety education programme.

### **Potential Benefits of Mobile Technologies**

Research has highlighted the widespread uptake of mobile technologies amongst adults and children of all ages. Web-based tools and resources have changed the landscape of learning. Learners now have at their fingertips unlimited access to digital content, resources, experts, databases and communities of interest. By effectively maximizing the use of such resources, schools not only have the opportunity to deepen learning, but they can also develop digital literacy, fluency and citizenship in learners that will prepare them for the high tech world in which they will live, learn and work.

### **Considerations**

There are a number of issues and risks to consider when implementing mobile technologies, these include; security risks in allowing connections to your school network, filtering of personal devices, breakages and insurance, access to devices for all learners, avoiding potential classroom distraction, network connection speeds, types of devices, charging facilities, total cost of ownership

Schools may consider implementing the use of mobile technologies as a means of reducing expenditure on school provided devices. However, it is important to remember that the increased network management costs and overheads involved in implementing this properly are likely to counterbalance or outweigh any savings.

The use of mobile technologies brings both real benefits and challenges for the whole school community – including teachers - and the only effective way for a school to implement these successfully is to involve the whole school community from the outset. Before the school embarks on this path, the risks and benefits must be clearly identified and shared with all stakeholders.

- The school acceptable use agreements for staff, learners and parents/carers will give consideration to the use of mobile technologies

The school allows:

	School/devices		Personal devices			
	School owned and allocated to a single user	School owned for use by multiple users	Learner owned	Staff owned	Visitor owned	Authorised personal device
Allowed in school	Yes	Yes	No	Yes	Yes	Yes
Full network access	Yes	Yes	N/A	No	No	Yes
Internet only	N/A	N/A	N/A	Yes	Yes	N/A

The school has provided technical solutions for the safe use of mobile technologies in school:

- All school devices are managed through the use of Mobile Device Management software
- Appropriate access control is applied to all mobile devices according to the requirements of the user (e.g Internet only access, network access allowed, shared folder network access)
- The school has addressed broadband performance and capacity to ensure that core educational and administrative activities are not negatively affected by the increase in the number of connected devices
- For all mobile technologies on the school network, filtering will be applied to the internet connection and attempts to bypass this are not permitted
- Appropriate exit processes are implemented for devices no longer used at a school location or by an authorised user. These may include; revoking the link between MDM software and the device, removing proxy settings, ensuring no sensitive data is removed from the network, uninstalling school-licensed software etc.
- All mobile devices on the school network are monitored
- The software/apps originally installed by the school must remain on the school owned device in usable condition and be easily accessible at all times. From time to time the school may add software applications for use in a particular lesson. Periodic checks of devices will be made to ensure that users have not removed required apps
- The school will ensure that devices contain the necessary apps for school work.
- The changing of settings that would stop the device working as it was originally set up and intended to work is not permitted

When personal devices are permitted/authorised:

- Personal devices commissioned onto the school network are segregated effectively from school-owned systems. Personal devices are brought into the school entirely at the risk of the owner and the decision to bring the device in to the school lies with the user as does the liability for any loss or damage resulting from the use of the device in school.
- The school accepts no responsibility or liability in respect of lost, stolen or damaged devices while at school or on activities organised or undertaken by the school (the school recommends insurance is purchased to cover that device whilst out of the home).
- The school accepts no responsibility for any malfunction of a device due to changes made to the device while on the school network or whilst resolving any connectivity issues.
- The school recommends that the devices are made easily identifiable and have a protective case to help secure them as the devices are moved around the school. Pass-codes or PINs should be set on personal devices to aid security.
- The school is not responsible for the day to day maintenance or upkeep of the users' personal device such as the charging of any device, the installation of software updates or the resolution of hardware issues.

Users are expected to act responsibly, safely and respectfully in line with current acceptable use agreements, in addition:

- Devices are not permitted in tests or exams.
- There is clear advice and guidance at the point of entry for visitors to acknowledge school requirements.
- Users are responsible for keeping their device up to date through software, security and app updates.
- Users are responsible for charging their own devices and for protecting and looking after their devices while in the school.
- Confiscation and searching (England) - the school has the right to take, examine and search any device that is suspected of unauthorised use, either technical or inappropriate.
- Users should be mindful of the age limits for app purchases and use and should ensure they read the terms and conditions before use.
- The expectations for taking/storing/using images/video aligns with the school's acceptable use policy and use of images/video policy. The non-consensual taking/using of images of others is not permitted.
- Staff owned devices should not be used for personal purposes during teaching sessions, unless in exceptional circumstances.
- Printing from personal devices will not be possible.
